Blind Canadian Will Lead Egyptian Blind to a Better Way of Life

Central Press Canadian

The blind will literally lead the blind when 42-year-old Arthur Magill of Toronto flies with his family, seen above, to Egypt where he will take up the directorship of the first experimental demonstration centre for the blind of backward countries, a new project jointly sponsored by the Egyptian government and the U.N. Mr. Magill, who was born in Cobourg and is now Ontario division super-

intendent for the Canadian National Institute for the Blind, lost the sight of one eye at the age of six months and the other when he was 17. Deciding more education would be a decided advantage, because of his condition, Mr. Magill completed his high school education and then went on to obtain his B.A. and his M.A. Chosen by Col. E. A. Baker, managing director of the CNIB,

who was first approached by the U.N. as to whether Canada had a sufficiently qualified person for this important post, he will be on a loan basis for one year. His job will be to do exactly what the CNIB is doing across Canada today—ameliorating the condition of the blind and preventing blindness. Of Egypt's 20,000,000 population, 75,000 are without sight.

Rotary Club Sends Clothes To Korea

Under the direction of the International Service Committee the local Rotary Club shipped fifteen packages of clothes to Korea last week.

This work was undertaken at the suggestion of Col. Robert Slover who is serving in Korea. In a letter to his wife and relatives here he requested that instead of sending a lot of Christmas to him they send along clothes for orphans and refugees. T. Geo. Wood, chairman of International Service Committee, brought the suggestion before the Rotary Club where it received wholehearted support.

The fifteen fifteen-pound parcels contained 10 suits, 5 coats, 5 overcoats, 4 mackinaws, 40 dresses, 10 pr. of shoes, 6 new ladies dresses, 10 new caps, 15 childrens pieces, 4 suits of long underwear, numerous socks and ties, and a bolt of cloth.

People bringing exhibits are asked to bring them to the Opera House between 9 and 12 noon so they can be properly placed in their classifications.

As in the past a special prize will be awarded to the individual having the largest display with emphasis on quality of the hobbies. These may consist of handwork, collections, woodwork, or any art. It is not necessary that these be made by the exhibitor.

Work On LDS Girls Camp To Begin Next Spring

It is hoped that the Summer Camp to be started in the spring will be ready for the girls of the Taylor Stake by July.

It is to be located where the Head Rangers Station was previously located; just across the lake from Camp Inauipi and just south of Kootney Brown's grave.

The location is a beautiful spot and will lend joy and happiness to the girls.

There is a fine beach so swimming will be one of the main sports. There will be tennis, miniature golf, volleyball and mountain climbing and a perfect setting for an amphitheatre.

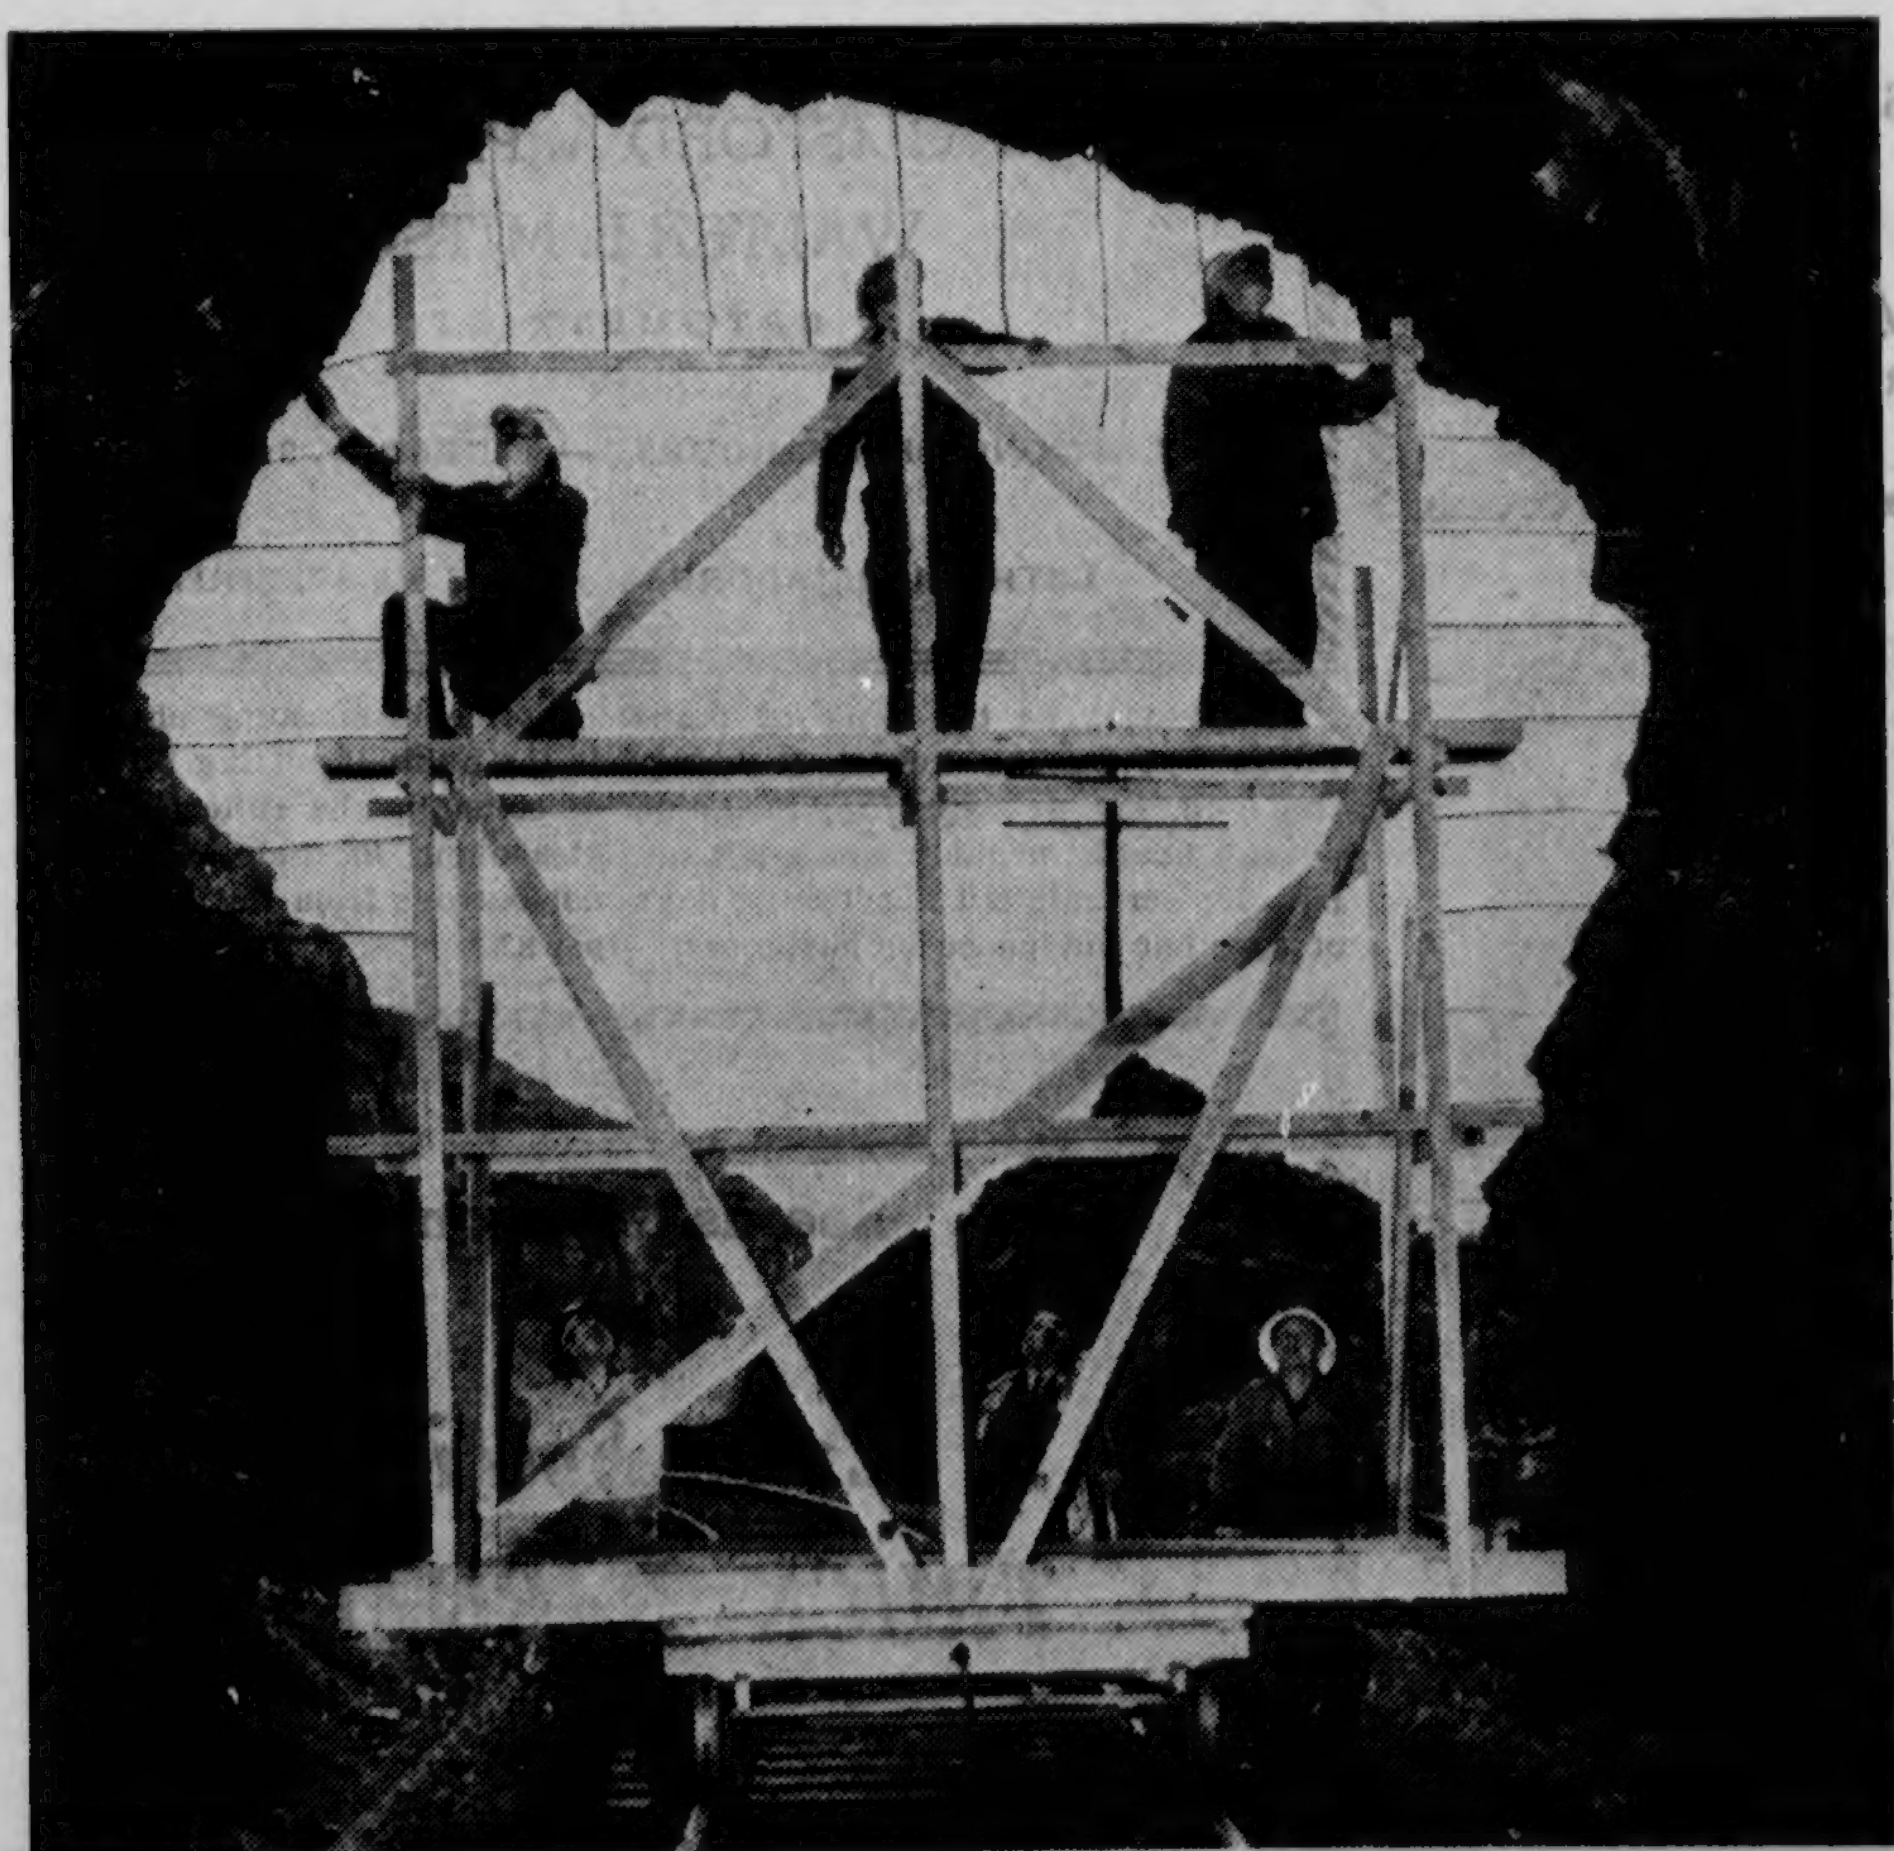

The Camp will consist of a large hall for sleeping and some recreation in case of a storm. It will be connected to the kitchen by a breezeway, which will serve as an outdoor dining room and stage for the amphitheatre.

The girls and women will occupy it in age groups and it is being planned that there will be time for older women and mothers to spend some happy relaxing days at this Summer Camp.

Pantry Sale and Bazaar To Be Held In The Legion Hall

We have some lovely aprons and pillow slips etc. at our bazaar and pantry sale and luncheon to be held at the Legion Hall instead of the Second Ward Church as previously announced.

about Cancer

QUESTION: Can a physician always tell when he has removed all the cancer?

ANSWER: The only way to tell if all cancer cells have been removed is to wait and see if the growth reappears. If a patient goes for five or more years after treatment without recurrence, there is but small chance of recurrence later in life.

Trying to build the brotherhood of man without the fatherhood of God is like trying to make a wheel without a hub.

Exercise alone is futile. While it will reduce weight, because it helps use up water, carbohydrates and fats exercise also stimulates the appetite. These two exercises help tremendously, however: (1) pushing one's chair away from the table when dessert is served; (2) turning the head slowly from right to left and back again when second helpings are offered.

How Long Will You Live?— No one knows, of course, but to some extent it depends on where you live. For instance, United Nations statistics show that persons living in the United States and Canada have a life expect any today of 68.3 and 67.2 years, respectively; whereas Mexicans can expect to live only 33.3 years. Better health facilities, better nutrition and better living conditions account largely for the difference.
